

Real-time Mobile Sync of Email, Contacts, Calendar and Tasks

Oxford Networks' Real-time Mobile Email synchronizes email, contacts, calendar, and tasks between your mobile phone and Oxford Networks' award-winning hosted email service, providing flexibility to access the same consistent set of information anytime from anywhere like never before.

Configuration of any of the 800 or more mobile devices supported is simple. Just launch the setup wizard in Oxford Networks' webmail and the required software will be pushed out to your phone.

Real Time Email, Always Available

- ✓ Push technology automatically sends messages to your phone the instant they are received
- ✓ Extend your battery life — no more polling for new messages
- ✓ Always have the latest data available now no matter how you access your email

Stay in Sync with Contacts, Calendar, and Tasks

- ✓ With Real-time Mobile Email, contacts, calendar, and task synchronization is included free*
- ✓ Relax knowing that you always have a back-up both on your desktop and in the cloud

Supports iPhone, BlackBerry, Windows Mobile, and More

- ✓ Over 800 mobile devices supported
- ✓ Simple wizard-based set-up

*Certain features may not be available for all mobile devices.
